DESCRIPTION

The ENDEVCO® Model 2223D is a triaxial piezoelectric accelerometer designed specifically for vibration measurement of three orthogonal axes on small structures and objects. Its light weight (41 gm) effectively minimizes mass loading. All three individual sensors are isolated from each other and from the mounting surface by a hard anodized isolator. The accelerometer is a self-generating device that requires no external power source for operation.

The Model 2223D features ENDEVCO's PIEZITE® Type P-8 crystal element operating in annular shear mode. This device exhibits excellent output sensitivity stability over time. Low-noise coaxial cables are supplied for error-free operation.

ENDEVCO Signal Conditioner Models 133, 2775A or OASIS 2000 Computer-Controlled System are recommended for use with this high impedance accelerometer.

NOTES

1. Low-end response of the transducer is a function of its associated electronics.
2. The three sensing elements are electrically isolated from each other and from the mounting surface. The X axis signal ground is connected to the transducer case to provide electrostatic

3. shielding for all three sensors.
3. Insulated mounting screws (3 supplied, 4-40 x 7/8 in) must be used to ensure transducer isolation from the mounting surface.
4. Short duration shock pulses, such as those generated by metal-to-metal impacts, may excite transducer resonance and cause linearity errors. Send for TP290 for more details.
5. Maintain high levels of precision and accuracy using Endevco's factory calibration services. Call Endevco's inside sales force at 800-982-6732 for recommended intervals, pricing and turn-around time for these services as well as for quotations on our standard products.

Continued product improvement necessitates that Endevco reserve the right to modify these specifications without notice. Endevco maintains a program of constant surveillance over all products to ensure a high level of reliability. This program includes attention to reliability factors during product design, the support of stringent Quality Control requirements, and compulsory corrective action procedures. These measures, together with conservative specifications have made the name Endevco synonymous with reliability.
